

The Enhanced Preventive Drug Benefit

A special benefit for members enrolled in an HSA-compliant plan

Your prescription drug coverage includes an expanded list of preventive medications that are not subject to your deductible. This lets you get the most out of your FlexRxSM benefits from your very first day of coverage. When you fill a prescription for the drugs listed below, you'll pay only the applicable copay and/or coinsurance, depending on your plan.

You can get the most up-to-date list of qualifying drugs—along with personalized cost-sharing information—on the member portal at allwaysmember.org.

Drug List

Anaphylaxis/Adrenergic Agents

Epinephrine Injections
Epinephrine Solutions

Anticoagulants
