### Overview

Cosela is indicated to decrease the incidence of chemotherapy-induced myelosuppression in adult patients when administered prior to a platinum/etoposide-containing regimen or topotecan-containing regimen for extensive-stage small cell lung cancer (ES-SCLC).

### Coverage Guidelines

Authorization may be reviewed for members new to AllWays Health Partners who are currently receiving treatment with Cosela excluding when the product is obtained as samples or via manufacturer's patient assistance programs.

#### OR

Authorization may be granted for members when ALL the following criteria are met, and documentation is provided:

1. The member is using Cosela to decrease the incidence of chemotherapy-induced myelosuppression.
2. Documentation the member has extensive-stage small cell lung cancer
3. The member will be receiving Cosela prior to either of the following chemotherapeutic regimens:
  - a. platinum/etoposide-containing regimen.
  - b. topotecan-containing regimen.
4. The requested medication will not be used with granulocyte colony-stimulating factor (G-CSF) and/or erythropoiesis-stimulating agents (ESAs) as primary prophylaxis during cycle.

### Continuation of Therapy

Reauthorization will be granted if member meets all initial authorization criteria.

## Limitations

1. Initial approvals and reauthorizations will be granted for 6 months
