### Overview

Golimumab is a tumor necrosis factor (TNF) inhibitor that suppresses the physiologic response to tumor necrosis factor, which is part of the inflammatory response.

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met, and the member has no exclusions to the prescribed therapy.

#### FDA-Approved Indications

1. Moderately to severely active rheumatoid arthritis (RA) in combination with methotrexate
2. Active psoriatic arthritis (PsA)
3. Active ankylosing spondylitis (AS)

All other indications are considered experimental/investigational and are not a covered benefit.

### Coverage Guidelines

#### **Moderately to severely active rheumatoid arthritis (RA)**

Authorization may be granted for members new to AllWays Health Partners who are currently receiving treatment with Simponi Aria, excluding when the product is obtained as samples or via manufacturer's patient assistance programs.

#### **OR**

Authorization may be granted when the following criteria is met:

1. The member has a diagnosis of moderate to severely active rheumatoid arthritis (RA)
2. Member meets one of the following:

- a. Member has experienced an inadequate response to at least a 3-month trial of methotrexate despite adequate dosing (i.e., titrated to 20 mg/week).
- b. Member has an intolerance or contraindication to methotrexate (see Appendix A).

**Active psoriatic arthritis (PsA)**

Authorization may be granted for members new to AllWays Health Partners who are currently receiving treatment with Simponi Aria, excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.

**OR**

Authorization may be granted when the following criteria is met:

- 1. The member has a diagnosis of active psoriatic arthritis (PsA)
- 2. Member meets one of the following:
  - a. The member has had an intolerance to or inadequate response (after at least 3 months of treatment) with methotrexate OR leflunomide.
  - b. The member has a contraindication to BOTH methotrexate and leflunomide AND has experienced an inadequate response, intolerance, or contraindication to sulfasalazine.

**Active ankylosing spondylitis (AS)**

Authorization may be granted for members new to AllWays Health Partners who have previously received Simponi Aria or any other biologic DMARD indicated for active ankylosing spondylitis.

**OR**

Authorization may be granted when the following criteria is met:

- 1. The member has a diagnosis of active ankylosing spondylitis
- 2. Member meets one of the following criteria:
  - a. Member has experienced an inadequate response to at least two non-steroidal anti-inflammatory drugs (NSAIDs) over a 4-week period in total at maximum recommended or tolerated anti-inflammatory dose.
  - b. Member has an intolerance and/or contraindication to two or more NSAIDs

**Continuation of Therapy**

Reauthorization may be granted for all members (including new members) who meet all initial authorization criteria and achieve or maintain positive clinical response after at least 3 months of therapy with Simponi Aria as evidenced by low disease activity or improvement in signs and symptoms of the condition.

**Limitations**

- 1. Initial approvals and reauthorizations will be granted for 24 months
- 2. For all indications: Member has a pretreatment tuberculosis (TB) screening with a TB skin test or an interferon gamma release assay (e.g., QFT-GIT, T-SPOT.TB).
  - a. Note: Members who have received Simponi Aria or any other biologic DMARD or targeted synthetic DMARD (e.g., Xeljanz) are exempt from requirements related to TB screening in this Policy.
- 3. The following quantity limits apply:

Simponi	1 per 28 days
---------	---------------

**Appendices**

## Appendix A

### Examples of Contraindications to Methotrexate

1. Alcoholism, alcoholic liver disease or other chronic liver disease
2. Breastfeeding
3. Blood dyscrasias (e.g., thrombocytopenia, leukopenia, significant anemia)
4. Elevated liver transaminases
5. History of intolerance or adverse event
6. Hypersensitivity
7. Interstitial pneumonitis or clinically significant pulmonary fibrosis
8. Myelodysplasia
9. Pregnancy or planning pregnancy (male or female)
10. Renal impairment
11. Significant drug interaction
