Overview

Aimovig, Ajoovy, Emgality and Vyepti are calcitonin gene-related peptide receptor (CGRP) antagonists indicated for the prophylactic treatment of migraines in adults and episodic cluster headaches (**Emgality only**). Aimovig, Ajoovy and Emgality are subcutaneous injections. Vyepti is an IV infusion and is covered on the medical benefit only.

Coverage Guidelines

Authorization may be granted for members who are currently receiving treatment with the requested medication, excluding when the product is obtained as samples or via manufacturer’s patient assistance programs

OR

Authorization may be granted when one of the following criteria is met:

Prophylactic Treatment of Migraines

Authorizations may be granted for the prophylactic treatment of migraines when the following criteria are met:

1. The member is ≥ 18 years of age **AND**
2. Prescriber is a neurologist or headache specialist, or the prescription is being written for the member in consultation with a neurologist or headache specialist.
3. The member has been experiencing at least 4 migraine days per month **AND**

4. The member has had an inadequate response to a trial of at least three different prophylactic migraine medications each with different mechanisms of action (a total of 3 required trials) that have each been tried for at least 60 days in duration within the past 3 years. Both trials must be from Level A or Level B categories within the American Academy of Neurology Guidelines (AAN) (see Appendix A) **AND**
5. The member has not been treated with Botox for migraines within the past 4 months **AND**
6. The member is not currently using any other CGRP or Botox for the treatment of migraines **AND**
7. **For Aimovig only**, the member has had an inadequate response or adverse reaction to both Emgality **AND** Ajovy.

Note: triptans will not be considered as prophylactic options

Episodic Cluster Headaches

Authorization for Emgality for the treatment of episodic cluster headaches may be granted when the following criteria are met:

1. The member is ≥ 18 years of age **AND**
2. Prescriber is a neurologist or headache specialist, or the prescription is being written for the member in consultation with a neurologist or headache specialist **AND**
3. The member has experienced at least 5 episodes of cluster headaches within the past 12 months **AND**
4. The member has had an inadequate response to a trial of injectable sumatriptan or intranasal sumatriptan or intranasal zolmitriptan

Continuation of Therapy

Reauthorizations may be approved when physician assessment is submitted documenting improvement as evidenced by a decrease in frequency and severity of migraines or cluster headaches.

Limitations

1. Initial approvals will be granted for to 3 months
2. Reauthorizations will be granted for 12 months
3. The following quantity limits apply

Aimovig 70mg/mL	1 pen per 30 days
Aimovig 140mg/mL	1 pen per 30 days
Ajovy 225mg/1.5mL pre-filled syringe and Ajovy 225mg/1.5mL autoinjector	1 pen per 30 days or 3 pens (675mg) every 90 days
Emaglity	<u>Migraines</u> 2 pens (240mg) for initial month, then 1 pen per 30 days <u>Cluster headaches</u> Loading dose: 3x100mg (3 consecutive doses) Maintenance dose: 300mg every 4 weeks
Vypeti 100mg/mL	100mg (1mL) every 3 months

Appendix

AAN Medication Guideline Recommendations for Migraine Prevention

1. **Level A.:** The following medications are established as effective and should be offered for migraine prevention.

- Antiepileptic drugs (AEDs): divalproex sodium, sodium valproate, topiramate
 - Beta-blockers: metoprolol, propranolol, timolol
2. **Level B.** The following medications are probably effective and should be considered for migraine prevention:
- Antidepressants: amitriptyline
 - Antidepressants: venlafaxine
 - Beta-blockers: atenolol, nadolol

Review History

04/17/2019 – Reviewed

07/01/2019 – Implemented

09/18/2019 - Added cluster headaches indication to Emgality

07/22/2020 – added new formulation of Ajoyv autoinjector to criteria. Effective 8/1/20

11/18/2020- Added new drug Vyepiti to criteria. Effective 1/1/2021; separated out MH vs. Comm/Exch.

03/17/2021 – removed Aimovig 70mg as dose was discontinued. Effective 06/01/2021.

11/17/2021 – Reviewed and Updated; Criteria updated to Ajoyv and Emgality and preferred products.

Effective Date: 1/1/2022
