**Contact Information**

**Overview**

Prescriptions that meet the initial step therapy requirements will adjudicate automatically at the point of sale. If the prescription does not meet the initial step therapy requirements, the prescription will deny with a message indicating that prior authorization (PA) is required. Refer to the criteria below and submit a PA request for the members who do not meet the initial step therapy requirements at the point of sale.

Initial Step-Therapy Requirements:
- **First-Line**: Medications listed on first-line are covered without prior-authorization.
- **Second-Line**: Second-line medications will pay if the member has filled all first-line medications or a second-line medication within the past 180 days.

**Coverage Guidelines**

If a member does not meet the initial step therapy requirements, then approval of a second-line medication will be granted if the member has had a documented inadequate response or side effect to all first-line medications.
