Overview
The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met, and the member has no exclusions to the prescribed therapy.

FDA-Approved Indications
1. Moderately to severely active rheumatoid arthritis (RA)
2. Cryopyrin-Associated Periodic Syndromes (CAPS)
3. Neonatal-Onset Multisystem Inflammatory Disease (NOMID)

Compendial Uses
1. Systemic juvenile idiopathic arthritis (sJIA)
2. Adult-onset Still’s disease
4. Recurrent pericarditis
5. Hyperimmunoglobulin D syndrome [Mevalonate Kinase Deficiency (MKD)]

All other indications are considered experimental/investigational and are not a covered benefit.

Coverage Guidelines

Moderately to Severely Active Rheumatoid Arthritis (RA)
1. Authorization may be granted for members who are currently receiving treatment with Kineret, excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.
OR

2. Authorization may be granted for treatment of moderately to severely active RA for members who meet one of the following criteria:
   a. Member has experienced an inadequate response or intolerance to ALL preferred products (Enbrel, Humira and Rinvoq).
   b. Member has a contraindication to Enbrel, Humira AND Rinvoq and meets one of the following:
      - Member has experienced an inadequate response to at least a 3-month trial of methotrexate despite adequate dosing (i.e., titrated to 20 mg/week).
      - Member has an intolerance or contraindication to methotrexate (see Appendix).

Adult Onset Still’s Disease
Authorization may be granted for members who meet ANY of the following criteria:
1. Member has experienced an inadequate response to at least a 3-month trial of methotrexate
2. Member has intolerance or contraindication to methotrexate (See Appendix)
3. Member has a febrile disease

Active Systemic Juvenile Idiopathic Arthritis (sJIA)
1. Authorization may be granted for the treatment of sJIA for members who have received Actemra or Ilaris in a paid claim through a pharmacy or medical benefit within the previous 120 days.
   OR
2. Authorization may be granted for the treatment of active sJIA for members who have had an inadequate response to a trial of NSAIDS and one of the following: corticosteroids, methotrexate, or leflunomide.

Neonatal-Onset Multisystem Inflammatory Disease (NOMID)
Authorization of 24 months may be granted for the treatment of Cryopyrin-associated periodic syndromes (CAPS), including NOMID (also known as Chronic Infantile Neurological Cutaneous and Articular syndrome (CINCA)).

Recurrent Pericarditis
Authorization of 12 months may be granted for the treatment of recurrent pericarditis for members who have failed a first-line therapy agent (i.e., colchicine).

Non-Hodgkin’s Lymphoma – Multicentric Castleman’s Disease
Authorization of 12 months may be granted for the treatment of multicentric Castleman’s disease.

Hyperimmunoglobulin D Syndrome [Mevalonate Kinase Deficiency (MKD)]
Authorization of 24 months may be granted for the treatment of hyperimmunoglobulin D syndrome.

Continuation of Therapy

Adult Onset Still’s Disease, Rheumatoid Arthritis and Juvenile Idiopathic Arthritis
Reauthorization may be granted for all members (including new members) who have achieved or maintained a positive clinical response after at least 3 months of therapy with Kineret as evidenced by low disease activity or improvement in signs and symptoms of the condition.
Neonatal-Onset Multisystem Inflammatory Disease (NOMID), Multicentric Castleman’s disease, and Hyperimmunoglobulin D Syndrome

Reauthorization of may be granted for all members (including new members) requesting authorization for continuation of therapy must meet all initial authorization criteria and documentation has been submitted of positive clinical response as evidenced by low disease activity or improvement in signs and symptoms of the condition.

Recurrent Pericarditis

Authorization of 6-month intervals may be granted for all members (including new members) requesting authorization for continuation of therapy must meet all initial authorization criteria and documentation has been submitted of positive clinical response as evidenced by low disease activity or improvement in signs and symptoms of the condition.

Limitations

1. Initial approvals will be based on diagnosis:
   a. Moderately to Severely Active Rheumatoid Arthritis (RA) – 24 months
   b. Adult Onset Still’s Disease – 24 months
   c. Active Systemic Juvenile Idiopathic Arthritis (sJIA) – 24 months
   d. Neonatal-Onset Multisystem Inflammatory Disease (NOMID) – 24 months
   e. Recurrent Pericarditis – 12 months
   f. Non-Hodgkin’s Lymphoma – Multicentric Castleman’s Disease – 12 months
   g. Hyperimmunoglobulin D Syndrome [Mevalonate Kinase Deficiency (MKD)] – 24 months

2. Reauthorizations will be based on diagnosis:
   a. Adult Onset Still’s Disease, Rheumatoid Arthritis and Juvenile Idiopathic Arthritis – 24 months
   b. Neonatal-Onset Multisystem Inflammatory Disease (NOMID), Multicentric Castleman’s disease, and Hyperimmunoglobulin D Syndrome – 12 months
   c. Recurrent Pericarditis – 6 months

Appendix

Examples of Contraindications to Methotrexate

1. History of intolerance or adverse event
2. Alcoholic liver disease or other chronic liver disease
3. Elevated liver transaminases
4. Interstitial pneumonitis or clinically significant pulmonary fibrosis
5. Renal impairment
6. Current pregnancy or planning pregnancy
7. Breastfeeding
8. Blood dyscrasias (e.g., thrombocytopenia, leukopenia, significant anemia)
9. Myelodysplasia
10. Hypersensitivity
11. Significant drug interaction
