Overview

Prescriptions that meet the initial step therapy requirements will adjudicate automatically at the point of sale. If the prescription does not meet the initial step therapy requirements, the prescription will deny with a message indicating that prior authorization (PA) is required. Refer to the criteria below and submit a PA request for the members who do not meet the initial step therapy requirements at the point of sale.

Initial Step-Therapy Requirements:

First-Line: Medications listed on first-line are covered without prior-authorization.

Second-Line: Second-line medications will pay if the member has filled at least two different first-line medications or a second-line medication within the past 180 days.

Coverage Guidelines

If a member does not meet the initial step therapy requirements, then approval of a second-line medication will be granted if the member has had a documented inadequate response, side effect, or a contraindication to two different first-line medications.

FIRST-LINE	SECOND-LINE
Oxybutynin extended-release tablets Oxytrol® (oxybutynin) OTC patch† Trospium chloride extended-release capsules	Darifenacin extended-release tablets Gelnique® (oxybutynin) gel Myrbetriq® extended-release (mirabegron) tablets Tolterodine extended-release capsules Toviaz® extended-release (fesoterodine) tablets VESIcare® (solifenacin) tablets

Oxytrol® (oxybutynin TD) Rx patch is a plan exclusion. † Note: Oxytrol OTC patches are listed as “Oxytrol For Women”

Limitations

Approvals will be granted for 36 months
