Overview

Olumiant is a Janus kinase (JAK) inhibitor indicated for:

- Treatment of adult patients with moderately to severely active rheumatoid arthritis who have had an inadequate response to one or more TNF antagonist therapies.

Olumiant® (baricitinib) is FDA approved for the treatment of COVID-19 in hospitalized adults requiring supplemental oxygen, non-invasive or invasive mechanical ventilation, or extracorporeal membrane oxygenation (ECMO). The use of Olumiant® (baricitinib) for this indication is permitted only in an inpatient hospital setting.

Coverage Guidelines

Authorization may be reviewed on a case by case basis for members new to AllWays Health Partners who are currently receiving treatment with Olumiant excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.

OR

Authorization may be granted for members when **ALL** the following criteria are met, and documentation is provided:

1. Member has a diagnosis of moderate to severe rheumatoid arthritis (RA)
2. Paid claims or physician documented inadequate response or adverse reaction to ONE traditional DMARD or contraindication to ALL traditional DMARDs (see Appendix A)
3. ONE of the following:
 - a. Paid claims or physician documented inadequate response or adverse reaction to ONE anti-TNF agent FDA approved for RA
 - b. Contraindication to ALL anti-TNF agents FDA-approved for RA

4. Paid claims or physician documented inadequate response, adverse reaction or contraindication to Xeljanz[®] (tofacitinib) or Xeljanz XR[®] (tofacitinib extended-release)
5. Appropriate dosing
6. Quantity requested is ≤ 1 tablet/day

Continuation of Therapy

Reauthorization by prescriber for any of the following FDA-approved diagnoses will infer a positive response to therapy and request can be recertified if dosing is appropriate.

Limitations

1. Initial approvals will be granted for 6 months
2. Reauthorizations will be granted for 12 months
3. The following quantity limits apply:

Olumiant 1mg and 2mg	30 tablets per 30 days
----------------------	------------------------

Appendices

Appendix A: Traditional DMARDS

Traditional DMARDS*	
azathioprine	methotrexate*
cyclosporine	sulfasalazine*
hydroxychloroquine*	thalidomide
leflunomide	
If a member has a contraindication to ALL of the most commonly used traditional DMARDS* (methotrexate, sulfasalazine, and hydroxychloroquine), a trial with a traditional DMARD may be bypassed.	

Appendix B. Conventional Therapies for Plaque Psoriasis

Conventional Treatment Lines	Agents Used
Topical Agents	emollients, keratolytics, corticosteroids, coal tar, anthralin, calcipotriene, tazarotene, calcitriol, calcineurin inhibitors
Systemic Agents	Traditional DMARDS: methotrexate, apremilast, acitretin,
Phototherapy	ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA), narrow band UV-B (NUVB)

Appendix C: More frequent/Higher doses

Requests more frequent or higher doses of injectable biologics, may be approved if **ALL** of the following is provided:

1. Documentation of severe disease
2. **ONE** of the following:
 - a. Inadequate response or adverse reaction to **ONE** other injectable biologic which is FDA-approved for the requested indication
 - b. Contraindication to **ALL** other injectable biologics which are FDA-approved for the requested indication
3. Documented partial response to FDA-approved dosing of current biologic therapy
4. Documentation of specialist consult for the requested indication
