### Overview

Olumiant is a Janus kinase (JAK) inhibitor indicated for:

- Treatment of adult patients with moderately to severely active rheumatoid arthritis who have had an inadequate response to one or more TNF antagonist therapies.
- Treatment of adult patients with severe alopecia areata.

Olumiant® (baricitinib) is FDA approved for the treatment of COVID-19 in hospitalized adults requiring supplemental oxygen, non-invasive or invasive mechanical ventilation, or extracorporeal membrane oxygenation (ECMO). The use of Olumiant® (baricitinib) for this indication is permitted only in an inpatient hospital setting.

### Coverage Guidelines

Authorization may be reviewed on a case by case basis for members new to the plan who are currently receiving treatment with Olumiant excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.

#### OR

Authorization may be granted for members when **ALL** the following criteria are met, and documentation is provided:

#### Severe Alopecia Areata

Prescriber provides documentation of **ALL** of the following:

1. Diagnosis of severe alopecia areata
2. Prescriber is a dermatologist or consult notes from a dermatologist are provided
3. Member is  $\geq$  18 years of age

4. **ONE** of the following:
  - a. **BOTH** of the following:
    - i. Physician documented of inadequate response or adverse reaction to **ONE** or contraindication **ALL** to topical corticosteroids
    - ii. Physician documented of inadequate response or adverse reaction to **ONE** or contraindication to **ALL** intralesional corticosteroids
  - b. Physician documentation that member has a large area of hair loss (such as  $\geq 25\%$  scalp hair loss)
5. Physician documented of inadequate response or adverse reaction to **ONE** or contraindication to **BOTH** of the following:
  - a. Xeljanz<sup>®</sup> (tofacitinib)
  - b. Xeljanz XR<sup>®</sup> (tofacitinib extended-release)
6. Appropriate dosing
7. Requested quantity is  $\leq 1$  tablet/day

**Moderate to Severe Rheumatoid Arthritis**

1. Member has a diagnosis of moderate to severe rheumatoid arthritis (RA)
2. Paid claims or physician documented inadequate response or adverse reaction to **ONE** or contraindication to **ALL** traditional DMARDs (*see Appendix A*)
3. Paid claims or physician documented inadequate response or adverse reaction to **ONE** or contraindication to **ALL** anti-TNF agents that are FDA approved for RA
4. Paid claims or physician documented inadequate response, adverse reaction to **ONE** or contraindication to **BOTH** of the following:
  - a. Xeljanz<sup>®</sup> (tofacitinib)
  - b. Xeljanz XR<sup>®</sup> (tofacitinib extended-release)
5. Appropriate dosing
6. Quantity requested is  $\leq 1$  tablet/day

**Continuation of Therapy**

Reauthorization by prescriber for any of the following FDA-approved diagnoses will infer a positive response to therapy and request can be recertified if dosing is appropriate.

**Limitations**

1. Initial approvals will be granted for 6 months
2. Reauthorizations will be granted for 12 months
3. The following quantity limits apply:

Olumiant 1mg and 2mg	30 tablets per 30 days
----------------------	------------------------

**Appendices**

**Appendix A: Traditional DMARDs**

Traditional DMARDs*	
azathioprine	methotrexate*
cyclosporine	sulfasalazine*
hydroxychloroquine*	thalidomide
leflunomide	

If a member has a contraindication to **ALL** of the most commonly used traditional DMARDs\* (methotrexate, sulfasalazine, and hydroxychloroquine), a trial with a traditional DMARD may be bypassed.

**Appendix B. Conventional Therapies for Plaque Psoriasis**

Conventional Treatment Lines	Agents Used
Topical Agents	emollients, keratolytics, corticosteroids, coal tar, anthralin, calcipotriene, tazarotene, calcitriol, calcineurin inhibitors
Systemic Agents	Traditional DMARDs: methotrexate, apremilast, acitretin,
Phototherapy	ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA), narrow band UV-B (NUVB)

**Appendix C: More frequent/Higher doses**

Requests more frequent or higher doses of injectable biologics, may be approved if **ALL** of the following is provided:

1. Documentation of severe disease
2. **ONE** of the following:
  - a. Inadequate response or adverse reaction to **ONE** other injectable biologic which is FDA-approved for the requested indication
  - b. Contraindication to **ALL** other injectable biologics which are FDA-approved for the requested indication
3. Documented partial response to FDA-approved dosing of current biologic therapy
4. Documentation of specialist consult for the requested indication

**Review History**

05/20/2020 – Created and Reviewed May P&T. Effective 8/1/20.  
 10/21/2020 – Reviewed and Updated; separated out Comm/Exch vs. MassHealth. Matched MassHealth Preferred Unified Formulary for implementation 1/1/2021  
 11/17/2021 –Reviewed and Updated for Nov P&T; matched MH UPPL for 1/1/2022 implementation; added appendix with higher dose/more frequent dosing and off label indication. Effective 01/01/2022  
 06/22/2022 – Reviewed and Updated for June P&T; matched MH UPPL. Approval criteria was updated to require a step through at least one anti-TNF agent per updated FDA-labeling. Clarified Overview section to include treatment of COVID-19 in hospitalized adults. Continuation of therapy language was

updated. Removed “Atopic Dermatitis” from Appendix C as not relevant. Updated References. Effective 08/01/2022.

11/16/2022 – Reviewed and updated for Nov P&T; matched MH. Guideline update following FDA-approval in severe alopecia areata. Criteria will require a step through Xeljanz or Xeljanz XR regardless of their off-label use in this indication. Effective 11/01/2022
