**Exceptions**  
N/A

**Overview**  
The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met, and the member has no exclusions to the prescribed therapy.

**FDA-Approved Indications**
1. Moderately to severely active rheumatoid arthritis in adults
2. Moderately to severely active polyarticular juvenile idiopathic arthritis in patients 2 years of age or older for subcutaneous use and 6 years of age and older for IV use.
3. Active psoriatic arthritis

All other indications are considered experimental/investigational and are not a covered benefit.

**Coverage Guidelines**

**Moderately to severely active rheumatoid arthritis (RA)**
1. Authorization of 24 months may be granted for members who are currently receiving treatment with Orencia, excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.

2. Authorization of 24 months may be granted for treatment of moderately to severely active RA when one of the following criteria is met:
   a. Member has experienced an inadequate response or intolerance to BOTH Enbrel and Humira
b. Member has a contraindication to BOTH Enbrel and Humira and meets one of the following:
   i. Member has experienced an inadequate response to at least a 3-month trial of methotrexate despite adequate dosing (i.e., titrated to 20 mg/week).
   ii. Member has an intolerance or contraindication to methotrexate (see Appendix A).

Moderately to severely active polyarticular juvenile idiopathic arthritis (pJIA)
1. Authorization of 24 months may be granted for members who have previously received Orencia or Actemra.

2. Authorization of 24 months may be granted for treatment of active pJIA when any of the following criteria is met:
   a. Member has experienced an inadequate response to at least a 3-month trial of a TNF inhibitor.
   b. Member has intolerance or contraindication to a TNF inhibitor.

Active psoriatic arthritis (PsA)
1. Authorization of 24 months may be granted for members who are currently receiving treatment with Orencia, excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.

2. Authorization of 24 months may be granted for treatment of active psoriatic arthritis (PsA) if any of the following criteria is met:
   a. Member has had a documented inadequate response or intolerable adverse event with ALL the preferred products (Cosentyx, Enbrel, Humira, Otezla and Stelara).
   b. Member has a contraindication to all the preferred agents AND BOTH of the following criteria is met:
      a) One of the following:
         1) Member has had an inadequate response to at least a 3-month trial of at least one TNF inhibitor indicated for PsA (see Appendix B).
         2) Member has experienced an intolerance to a trial of at least one TNF inhibitor indicated for PsA.
         3) All TNF inhibitors indicated for PsA are not appropriate for the member (e.g., due to comorbidities or a history of infections).
      AND
      b) One of the following:
         1) Patient has had an intolerance to or inadequate response (after at least 3 months of treatment) with methotrexate OR leflunomide.
         2) Patient has a contraindication to BOTH methotrexate and leflunomide AND has experienced an inadequate response, intolerance, or has a contraindication to sulfasalazine.

Continuation of Therapy
Reauthorizations may be granted for all members (including new members) who meet all initial authorization criteria and achieve or maintain positive clinical response after at least 3 months of therapy.
with Oenerica as evidenced by low disease activity or improvement in signs and symptoms of the condition.

**Limitations**

1. Approvals will be granted for 24 months
2. For all indications: Member has a pretreatment tuberculosis (TB) screening with a TB skin test or an interferon gamma release assay (e.g., QFT-GIT, T-SPOT.TB).

Note: Members who have received Orencia or any other biologic DMARD or targeted synthetic DMARD (e.g., Xeljanz) are exempt from requirements related to TB screening in this Policy.

3. The following quantity limits apply:

<table>

**Appendix**

A: Examples of Contraindications to Methotrexate

1. Alcoholism, alcoholic liver disease or other chronic liver disease
2. Breastfeeding
3. Blood dyscrasias (e.g., thrombocytopenia, leukopenia, significant anemia)
4. Elevated liver transaminases
5. History of intolerance or adverse event
6. Hypersensitivity
7. Interstitial pneumonitis or clinically significant pulmonary fibrosis
8. Myelodysplasia
9. Pregnancy or planning pregnancy (male or female)
10. Renal impairment
11. Significant drug interaction

B: Examples of TNF Inhibitors Indicated for PsA

1. Cimzia
2. Enbrel
3. Humira
4. Inflectra (infliximab-dyyb)
5. Renflexis (infliximab-abda)
6. Remicade
7. Simponi
