**Exceptions**
N/A

**Overview**

Taltz® (ixekizumab) is a humanized interleukin-17A antagonist indicated for the treatment of adults with:

1. Moderate-to-severe plaque psoriasis who are candidates for systemic therapy or phototherapy
2. Active psoriatic arthritis
3. Active ankylosing spondylitis

**Coverage Guidelines**

Approval will be granted if the member meets the following diagnosis specific criteria:

**Moderate to severe plaque psoriasis**

Authorization may be granted for members who are currently receiving treatment with Taltz excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.

**OR**

Authorization may be granted for members when all the following criteria are met, and documentation is provided:

1. Member has a diagnosis of moderate-severe plaque psoriasis
2. Member is at least 6 years of age
3. Dosing is appropriate (see appendix)
4. Prescriber has provided documentation of ONE of the following:
   a. Inadequate response or adverse reaction to at least TWO conventional therapies in any one of the following combinations (combinations DO NOT have to be used concurrently):
      i. 1 topical agent + 1 systemic agent
      ii. 1 topical agent + 1 phototherapy (required for diagnosis of guttate psoriasis)
      iii. 1 systemic agent + 1 phototherapy
iv. 2 systemic agents
   b. Contraindication to ALL conventional therapies (topical agents, phototherapy, and systemic agents)
   c. Inadequate response or adverse reaction to either Humira OR Enbrel

Psoriatic arthritis
Authorization may be granted for members who are currently receiving treatment with Taltz excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.
OR
Authorization may be granted for members when all the following criteria are met, and documentation is provided:
   1. Member has a diagnosis of psoriatic arthritis AND
   2. Member is at least 18 years of age AND
   3. Prescriber has provided documentation of ONE of the following:
      a. Inadequate response, adverse reaction, or contraindication to at least ONE traditional DMARD (hydroxychloroquine, methotrexate, sulfasalazine)
      b. Inadequate response or adverse reaction to Enbrel OR Humira
   AND
   4. Dosing is appropriate (see appendix)

Ankylosing Spondylitis
Authorization may be granted for members who are currently receiving treatment with Taltz excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.
OR
Authorization may be granted for members when all the following criteria are met, and documentation is provided:
   1. Member has a diagnosis of ankylosing spondylitis AND
   2. Member is at least 18 years of age AND
   3. Prescriber has provided documentation of ONE of the following:
      a. Inadequate response or adverse reaction to two non-steroidal anti-inflammatory drug (NSAID)
      b. Contraindication to ALL NSAIDs
   4. Inadequate response or adverse reaction to either Humira OR Enbrel
   AND
   5. Dosing is appropriate (see appendix)

Continuation of Therapy
Reauthorization requires physician documentation indicating a positive response to therapy.

Limitations
   1. Initial approvals will be varied based on the treatment:
      a. For moderate to severe plaque psoriasis, approvals will be granted for 3 months.
      b. For psoriatic arthritis and ankylosing spondylitis, approvals will be granted for 6 months.
   2. Reauthorizations will be granted for 12 months.
## Appendices

### Dosing

<table>
<thead>
<tr>
<th>Taltz® (ixekizumab)</th>
<th>Plaque Psoriasis:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>SQ: 160 mg initially at week 0, followed by 80 mg at weeks 2, 4, 6, 8, 10 and 12; followed by 80 mg every four weeks</td>
</tr>
</tbody>
</table>

**Psoriatic Arthritis and Ankylosing Spondylitis:**

SQ: 160 mg initially at week 0, followed by 80 mg every 4 weeks.

For psoriatic arthritis patients with coexistent moderate-to-severe plaque psoriasis, use the dosing regimen for plaque psoriasis.
