Contact Information

Overview
Vitamin D analogues used as monotherapy or combined with a topical corticosteroid, (betamethasone dipropionate) are indicated for the treatment of plaque psoriasis.

Coverage Guidelines
Authorization may be granted for members who are currently receiving treatment with a calcipotriene, formulation, Enstilar, Sorilux or Taclonex excluding when the product is obtained as samples or via manufacturer’s patient assistance programs.

OR
Authorization may be granted for members when all of the following criteria are met, and documentation has been provided. episodes when all the following criteria are met, and documentation is provided:

1. For calcipotriene cream, ointment, and solution:
   - The member is ≥ 12 years of age
   - The member is diagnosed with plaque psoriasis
   - The member has had an inadequate response, intolerance or has a contraindication to a generic topical corticosteroid.
   - For Sorilux only: the member has had an inadequate response or intolerance to calcipotriene cream, ointment and solution
2. For calcipotriene and betamethasone dipropionate combination products:

Exceptions
N/A
• The member is ≥ 12 years of age
• The member is diagnosed with plaque psoriasis
• The member has had an inadequate response, intolerance or has a contraindication to a calcipotriene product and betamethasone dipropionate used concurrently as separate agents

3. For Enstilar:
• The member is ≥ 12 years of age
• The member is diagnosed with plaque psoriasis
• The member has had an inadequate response, intolerance or has a contraindication to a calcipotriene product and betamethasone dipropionate used concurrently as separate agents AND
• The member has had an inadequate response, intolerance or has a contraindication to a generic calcipotriene and betamethasone dipropionate combination product.

Continuation of Therapy
Reauthorization requires physician documentation of improvement of member’s condition.

Limitations
1. Approvals will be for 12 months

References
1. Taclonex (calcipotriene/betamethasone dipropionate suspension) [prescribing information]. Madison, NJ: Leo Pharma Inc; July 2019.
2. Enstilar (calcipotriene/betamethasone dipropionate foam) [prescribing information]. Madison, NJ: Leo Pharma Inc; July 2019.

Review History
07/22/2020: Reviewed and Updated July P&T Mtg; removed calcitriol (moved to NF); removed Taclonex as medication is available generic; combination products require previous use of betamethasone and calcipotriene concurrently or as separate agents; Sorilux requires trials of all calcipotriene formulations; references updated. Effective 10/01/2020.
